

## Questtec Drum Gage System Solution

### Remote Level Indicator with Guided Wave Radar Conversion

- Proprietary density error compensation
- More stable than drum level transmitter
- Allows for level gage isolation and potentially level transmitter or conductivity sensor removal as per ASME
- Multiple remote indicators possible
- 99% maintenance free
- ASME Section 1 code compliant

### Drum Level Gage

- LED Illuminator for extra bright visibility
- Single piece forged body
- Seals are compressed with flange, not with glass for better leakage protection
- Highest component material grade
- Inline repairable gage valve
- Can upgrade to new ASME standards on level gage indication
