

RECIRCshield - Restore Recirc Valve Reliability

Key Components

- Inline repairable Isolation Valve
- MV Flow Meter
- Standalone Controller

RECIRCshield Operation

- Protects your recirc system from leakage
- System is fail open for any scenario
- Suitable for all recirc valves
- Retains 100% OEM valve components
- Autonomous operation that is customized to each system
- Dew Set point typically at +10degF

Benefits

- Minimal installation cost
- Valuable pump operational data feedback
- No special tools required
- Improve Heat Rate
- Minimize repair cost on the isolation system and reduced repair needed on the recirculation valve
- Improve system reliability
- 2 year Warranty!
