

Physical Water Treatment Solution:

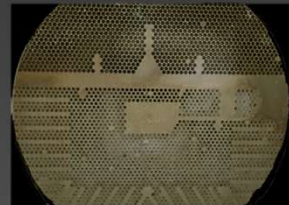

- Physical Water Treatment for cooling water, heat exchangers, aux systems, and pre-RO systems
- Proven and effective against biofilm and scale
- Prevent scale from forming on equipment
- Initially clean system from biofilm and prevent from newly forming
- Only proven physical water treatment effective by the ASHRAE protocol
- Protects and treats Legionella
- Multiple publications and many, well proven, installations in the Americas

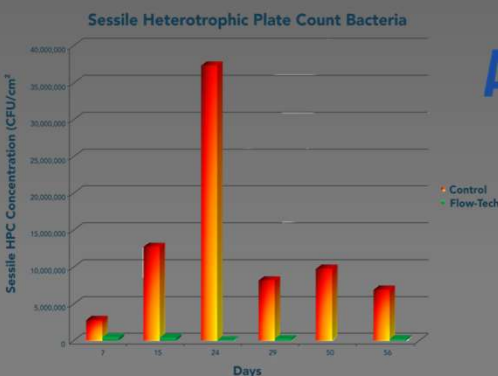

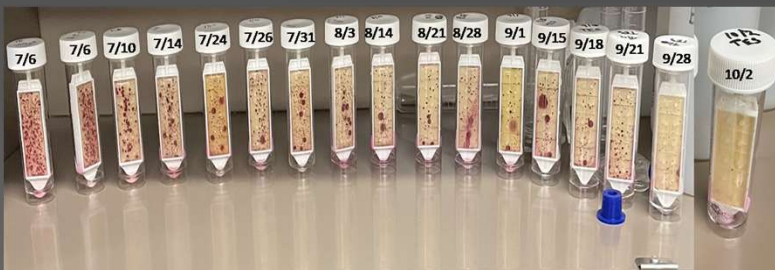

Prior

After 1 Year

After 2 Years

Impact

- Reduced environmental impact
- Improved heat transfer
- Keep steam turbine backpressure low
- Reduced condenser / heat exchanger / RO cleanings
- Significant Reduction in Chemicals
- Stabilize water
- Minimal maintenance required
